

New Construction

Educational Consultant, Architectural Consultant

The Board of Education is charged with developing concepts and educational specifications for construction of facilities. To provide the best possible educational environment within financial and physical constraints, it may be necessary to retain either an educational consultant or an architect who is familiar with the structures and equipment needed to house educational programs.

Choosing an Educational or Architectural Consultant

The Board will appoint a committee to interview qualified applicants for the project and recommend to the Superintendent an Educational or Architectural Consultant for the project. The Superintendent will make the final determination of the individual to be recommended to the Board.

Membership of the committee should include, when possible, an outside volunteer architect or person familiar with architectural designing, the Superintendent or designee, and Board of Education members.
